APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/617.810	07/14/2003	Tatsuya Sato	116580	4172

TITLE OF INVENTION: IMAGE SENSOR FOR READING IMAGE AND IMAGE READING APPARATUS INCLUDING THE IMAGE SENSOR

	APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
_	nonprovisional	NO	\$1440	\$300	\$0	\$1740	07/01/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or <u>Fax</u> (571)-273-2885

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 1100 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 1100 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: In response to the Office action dated September 19, 2007, and further to the amendments filed on December 19, 2007, applicant's request in view of the amendments and remarks have been reviewed and respectfully considered.

Claims 1-14, 16-7 and 23-24 are cancelled by applicant's amendment as indicated in page 1-8 of the applicant's response dated on 11/19/07. Therefore, the pending claims 15 and 18-28 are believe to be allowable for the reasons given below:

With respect to claim 15, [i.e., independent] is allowed for the reason the prior art searched and of record neither anticipates nor suggests the plurality of photoelectric conversion elements being divided into plural groups, each of the plural groups including a predetermined number (N) of the photoelectric conversion elements; a plurality of switching elements connected to respective ones of the plurality of photoelectric conversion elements, individually; a control unit that controls the plurality of switching elements in response to an external clock signal to simultaneously output the image signals from the predetermined number of photoelectric conversion elements in one of the plural groups.

Application/Control Number: 10/617,810

Page 3

Art Unit: 2625

Further, the claimed invention includes signal output lines with a number of N, wherein the predetermined number of photoelectric conversion elements in each of the plural groups are connectable with the respective ones of the signal output lines through the switching elements, individually, to output the image signals from the predetermined number of photoelectric conversion elements to the signal output lines, a multiplexer connected to the image sensor for multiplexing the image signals transferred from one of the photoelectric conversion elements through the corresponding one of the signal output lines.

In addition, a sample-and-hold circuit connected to the image sensor for temporarily storing the image signals transferred from the photoelectric conversion elements in one group though the corresponding ones of the switching elements and the signal output lines, wherein the multiplexer is configured to connect with the image sensor so that one output signal line connects the image sensor to the multiplexer directly and the other output signal lines connect the image sensor to the multiplexer through the sample-and-bold circuit.

In contrast, Yushiya '129' and Yumiba '359' either alone or in combination, fail to disclose or suggest, specifically, the above discussed limitation, including an image sensor comprising a predetermined number N of signal output lines for connecting the image sensor to a multiplexer; one signal output line connecting the image sensor to the multiplexer directly, and the other signal output lines connecting the image sensor to the multiplexer through a sample-and-hold circuit as disclosed in claim 15.

Further, *Regarding claim 18 [i.e., independent]* the prior art searched and of record fails to disclose a control unit that controls the plurality of switching elements and a control unit that controls the plurality of switching elements in response to an external clock signal to simultaneously output the image signals from the predetermined number of photoelectric conversion elements in one of the plural groups, wherein the predetermined number of photoelectric conversion elements in each of the plural groups are connectable with the respective ones of the signal output lines through the switching elements, individually, to output the image signals from the predetermined number of photoelectric conversion elements to the signal output lines, including a multiplexer having signal input terminals with a number equal to (N) and a signal output terminal, the multiplexer being connected to the image sensor so that the multiplexer receives the image signals from the plural photoelectric conversion elements that belong to one of the groups through the signal input terminals simultaneously.

In addition, the prior arts do not disclose or teach, Specifically, a multiplexer for converting the analog image signal supplied sequentially from the multiplexer into a digital sign, and resolution switching unit that select one of a high resolution mode in which all the image signals from the photoelectric conversion elements that belong to each of the groups are supplied sequentially to the analog-to-digital converter and a low resolution mode in which the image signals are thinned out.

To the contrary, Yushiya '129' in combination with Yumiba '359' either alone or in combination, fail to disclose or suggest, specifically, the arrangement of the claimed subject matter as discussed in claims 15 and 18.

Application/Control Number: 10/617,810 Page 5

Art Unit: 2625

Therefore, the above indicted application as discussed in both claims 15 and 18 are allowable for the reason the prior art searched and of record neither anticipates nor suggests the claimed invention, and claims 19-28 (i.e., dependent claims) are also allowed for being dependent on allowed claim 18.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NEGUSSIE WORKU whose telephone number is (571)272-7472. The examiner can normally be reached on 9A-6PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Coles can be reached on 571-272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
